## Preface

Ziauddin University Examination Board (ZUEB) was established by the Sindh ACT XLI 2018, with the aim of improving the quality of education. The Board administers examinations for the Secondary School Certificate (SSC) and Higher Secondary School Certificate (HSSC) based on the latest Reviewed National Curriculum by Directorate Curriculum Assessment and Research (DCAR) Sindh. ZUEB has a mandate by Ordinance to offer such examination services to English/Urdu and Sindhi medium candidates for SSC and HSSC from private schools in Sindh. This examination syllabus exemplifies ZUEB's commitment to provincial educational goals.

The Examination Board has prepared with the help of subject professors, subject wise syllabus. It is important to make the difference between syllabus and curriculum. The syllabus of a subject is considered as a guide for the subject teacher as well as the students. It helps the students understand the subject in detail. It also helps students to anticipate what is expected from them while preparing for the exams.

This examination syllabus brings together all those cognitive outcomes of the Provincial Curriculum statement which can be reliably and validly assessed. While the focus is on the cognitive domain, particular emphasis is given to the application of knowledge and understanding.

The examination syllabus is uploaded on the ZUEB website. This is done to help affiliated schools in planning their teaching. It is the syllabus, not the prescribed textbook which is the basis of the ZUEB examinations. In addition, the ZUEB examination syllabus is used to develop learning support materials for students and teachers. The examination board stand committed to all students who have embarked upon the SSC, and HSSC courses in facilitating their learning outcomes. Our examination syllabus document ensures all possible support.

On the Ziauddin University Examination Board website, a tab e -resource is made available which provides resource material in all subjects both in text form in line with the curriculum and also videos on topics to give students access to learn at their own pace and own time. These 15 to 20 minutes videos are prepared around subject concept / topics. These videos are available to the students for revisiting a lesson taught by their teacher or watch it prior to the lesson and as a reinforcement strategy. The work on videos is in progress and new titles will be uploaded.

Please look out for the videos on the given website.
Humbly Yours;

## Note:

1. Table 1 identifies the Student Learning objectives and their cognitive distribution (Knowledge, Understanding, Application).
2. The table illustrates that the share of knowledge is $17 \%$ with 16 SLOs, Understanding is $29 \%$ with 27 SLOs and Application is $54 \%$ with 51 SLOs
3. Higher emphasis has been given to application of learnt concepts. Students having good understanding of the concepts can apply them in a concrete manner to solve accounting problems.
4. Please note that Table 1 does not translate to marks distribution in the exam paper and weightage of each topic is calculated separately in Table 3

Table 2: No. of SLOs and their \% Share per Topic

| Topic No | Topic | Total SLOs | \% Share of SLOs |

| 4 | Depreciation | 14 | $15 \%$ |
| 5 | Non-Profit concern | 7 | $7 \%$ |
|  | Total | $\mathbf{9 4}$ | $\mathbf{1 0 0 \%}$ |

## Note:

1. Table 2: Shows the $\%$ share of SLOs per Topic.
2. The Topic of Accounting for company has the highest $\%$ share of SLOs at $39 \%$, followed by Partnership with $29 \%$. Non-profit concern has the lowest $\%$ share of SLOs at $7 \%$.
3. Please note that Table 2 does not translate to marks distribution in the exam paper and weightage of each topic is calculated separately in Table 3

## Maximum Marks: 100

Section 'A': Multiple Choice Questions (20\%) 20 Marks
( $\mathbf{1 \times 2 0 = 2 0 ) ~}$
Multiple Choice Question will cover the complete Syllabus

- Each MCQ carries 1 mark
- Given MCQs will be $=20 \mathrm{MCQs}$
- All MCQs to be answered

## Section 'B': Short Answer Questions (40\%) 40 Marks <br> $(4 \times 10=40)$

- Short Answer Question must be given from the prescribed Syllabus all content is to be followed.
- Six (6) Short Answer Questions may be given. Each Question having (10 Marks). In this Section Student shall attempt (4 Questions).

Section "C" (Detailed Answer Questions) (40\%) 40 Marks ( $2 \times 20=40$ )

- Three (03) Detailed Answer Questions may be given in this section and (2 Questions) are to be answered and each Question having (20 Marks).

## DEFINITIONS OF COGNITIVE LEVELS

## Remember

Remembering is the act of retrieving knowledge and can be used to produce things like definition or lists. The student must be able to recall or recognize information and concepts. The teacher must present information about a subject to the student, ask questions that require the student to recall that information and provide written or verbal assessment that can be answered by remembering the information learnt.

## Question Stems

Can you name all the ...?
Describe what happens when ...?
How is (are) ...?
How would you define ...?
How would you identify ...?
How would you outline ...?
How would you recognize...?
List the ... in order.
What do you remember about ...?
What does it mean?
What happened after?
What is (are) ...?
What is the best one?
What would you choose ...?
When did ...?
Where is (are) ...?
Which one ...?
Who spoke to ...?
Who was ...?
Why did ...?

## Understand

The next level in the taxonomic structure is Understanding, which is defined as the construction of meaning and relationships. Her the student must understand the main idea of material heard, viewed, or read and interpret or summarize the ideas in their own words. The teacher must ask questions that the student can answer in their own words by identifying the main idea.

## Question Stems

Can you clarify...?
Can you illustrate .?
Condense this paragraph.
Contrast ...
Does everyone think in the way that ... does?
Elaborate on ...
Explain why ...
Give an example
How can you describe
How would you clarify the meaning
How would you compare ...?
How would you differentiate between
...?
How would you describe...?

## BLOOMS TAXANOMY WITH EXAMPLES

If you are a teacher looking for ways to engage your students in learning, this LIST of questions might be interesting for your classroom practice. Bloom's Taxonomy question stems can help elicit higher-order thinking skills and promote critical thinking among learners at different taxonomy levels. These question stems can also encourage students to think about their knowledge through reflection before answering questions.
