## Preface

Ziauddin University Examination Board (ZUEB) was established by the Sindh ACT XLI 2018, with the aim of improving the quality of education. The Board administers examinations for the Secondary School Certificate (SSC) and Higher Secondary School Certificate (HSSC) based on the latest Reviewed National Curriculum by Directorate Curriculum Assessment and Research (DCAR) Sindh. ZUEB has a mandate by Ordinance to offer such examination services to English/Urdu and Sindhi medium candidates for SSC and HSSC from private schools in Sindh. This examination syllabus exemplifies ZUEB's commitment to provincial educational goals.

The Examination Board has prepared with the help of subject professors, subject wise syllabus. It is important to make the difference between syllabus and curriculum. The syllabus of a subject is considered as a guide for the subject teacher as well as the students. It helps the students understand the subject in detail. It also helps students to anticipate what is expected from them while preparing for the exams.

This examination syllabus brings together all those cognitive outcomes of the Provincial Curriculum statement which can be reliably and validly assessed. While the focus is on the cognitive domain, particular emphasis is given to the application of knowledge and understanding.

The examination syllabus is uploaded on the ZUEB website. This is done to help affiliated schools in planning their teaching. It is the syllabus, not the prescribed textbook which is the basis of the ZUEB examinations. In addition, the ZUEB examination syllabus is used to develop learning support materials for students and teachers. The examination board stand committed to all students who have embarked upon the SSC, and HSSC courses in facilitating their learning outcomes. Our examination syllabus document ensures all possible support.

On the Ziauddin University Examination Board website, a tab e -resource is made available which provides resource material in all subjects both in text form in line with the curriculum and also videos on topics to give students access to learn at their own pace and own time. These 15 to 20 minutes videos are prepared around subject concept / topics. These videos are available to the students for revisiting a lesson taught by their teacher or watch it prior to the lesson and as a reinforcement strategy. The work on videos is in progress and new titles will be uploaded.

Please look out for the videos on the given website.
Humbly Yours;

## Shahbaz Nasim Academic Head

## Aims of the syllabus of Business Statistics:

The Aims of teaching Business Statistics at Higher Secondary School Level are to:

- Introduce students to the expertise of collecting, analyzing, interpreting and presenting data.
- develop the skills necessary to make informed decisions based on data and improve business processes.
- provide them with the statistical knowledge and tools necessary to understand consumer behavior better and forecast future trends and patterns.
- To create a sense of appreciation for the role of statistics in business.

## ZIAUDDIN UNIVERSITY EXAMINATION BOARD STUDENT LEARNING OUTCOMES (SLO) CATEGORIZATION <br> XII- BUSINESS STATISTICS <br> Detailed Syllabus

| Topics | Sub-Topics | Student Learning Outcomes | Cognitive Levels |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | K | U | A |
| Introduction | Definition, Characteristics, functions of statistics. <br> Basic concepts \& important terms. <br> Types of Data. <br> Data Collection. | Define Statistics. <br> Describe characteristics of statistics. Define Descriptive and Inferential statistics. <br> Define Population, sample, parameter, statistics, variables, qualitative and quantitative variables, discrete and continuous variables, primary and secondary data. <br> Describe methods of collection of primary data. <br> Describe methods of collection of secondary data. <br> List functions of statistics <br> List limitations of statistics <br> Explain the application of statistics in different fields. |  | * |  |
| Presentation of Data | Frequency Distribution. <br> Simple Frequency <br> Distribution. <br> Group Frequency <br> Distribution. | Define presentation of data, frequency distribution, Grouped data, and Array. Describe the three methods for organizing data in logical form. Construct simple Frequency Distribution. <br> Construct Grouped Frequency <br> Distribution. <br> Describe the basic steps or construction of a grouped frequency distribution. <br> Explain the advantages of a frequency distribution <br> Describe Relative frequency distribution. <br> Find Relative frequency distribution. <br> Describe Cumulative frequency distribution. <br> Find "less than" and "more than" Cumulative frequency distribution. Describe Qualitative frequency distribution. <br> Find Qualitative frequency distribution. | * | * | $*$ $*$ $*$ $*$ $*$ $*$ $*$ $*$ |
| Graphs and Diagrams | Graphs | Explain why graphs and diagrams are used. |  | * |  |

|  | Diagrams | Draw Histogram for frequency distribution <br> Draw Frequency Polygon for frequency distribution. <br> Draw Frequency curve for frequency distribution. <br> Draw Ogives for frequency distribution. <br> Draw Simple Bar Diagram to represent data <br> Draw Multiple Bar Diagram to represent data. <br> Draw Sub-divided/Component Bar Diagram to represent data. <br> Draw Pie Diagram to represent data. |  |  | * |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Averages | Mean <br> Median <br> Mode <br> Empirical Relationship b/w Mean, Median, Mode | Define Average and when it is used. Define arithmetic mean and write its formula. <br> Calculate Arithmetic Mean. <br> Describe the properties of Arithmetic Mean. <br> Calculate Arithmetic Mean using its properties. <br> Calculate Combined Mean. <br> Calculate Weighted Mean <br> Calculate Mean from frequency distribution/ Grouped data. <br> Define Median and write its formula. Calculate Median of Un-grouped data Calculate Median of Grouped data. Draw Median by Graph for data. <br> Define Mode. <br> Calculate Mode from un-grouped data. <br> Calculate Mode from grouped data. Draw Mode by Graph for data. Describe the empirical relation $\mathrm{b} / \mathrm{w}$ Mean, Median and Mode. Solve problems using the empirical relationship $\mathrm{b} / \mathrm{w}$ the averages. | * | * | * |
| Index Numbers | Index Numbers. <br> Types of Index Numbers. <br> Laspeyre, Paasche, <br> Fisher's Formulas | Define Index Numbers. <br> Explain the types and classification of Index Numbers. <br> Explain the methods of construction of price index numbers. <br> Calculate Price Index numbers using fixed base method. Calculate Price Index numbers using chain base method. Describe base shifting. | * | * | * |

|  |  | Calculate index numbers by shifting the base. <br> Explain construction of composite price index numbers using simple aggregative method and simple average method. <br> Calculate the Price Index using <br> Simple aggregative method (Fixed Base) <br> Calculate the price index using simple average of Relatives Method (fixed base) <br> Calculate using Simple average of Relatives Method (chain base) <br> Describe weighted index numbers and its types. <br> Define Laspeyre's Formula, and write down the formula. <br> Calculate Laspeyre's Price Index. <br> Define Paasche's Formula, and write down the formula. <br> Calculate Paasche's Price Index. <br> Define Fisher's Formula, and write down the formula. <br> Calculate Price Index using Fisher's ideal formula. | $*$ $*$ $*$ $*$ | * | $*$ <br> $*$ <br> $*$ <br> $*$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Probability Theory | Permutations Combinations Probability | Explain factorial notation. <br> Solve problems on factorial notation. <br> Explain Permutations <br> Solve problems on Permutations of " n " different objects taken " r " at a time. <br> Solve problems on Permutations of " n " objects when they are not all different. <br> Explain combination, and write its formula. <br> Solve problem on combination of " n " different objects taken " $r$ " at a time. <br> Define Experiment, Outcome, Sample Space, and Event. <br> Define Probability. <br> Explain Probability theory. <br> Explain basic properties of probability. <br> Calculate probability of simple events. <br> Calculate probability of complementary events. <br> Describe mutually exclusive events. | * | * | $*$ $*$ $*$ $*$ $*$ $*$ $*$ $*$ $*$ |

|  |  | Solve problems on probability of <br> mutually exclusive events. <br> Describe not mutually exclusive <br> events. <br> Solve problems on probability of non- <br> mutually exclusive events. <br> Describe independent events. <br> Solve problems on probability of <br> independent events. <br> Describe dependent events. <br> Solve problems on probability of <br> dependent events. | $*$ | $*$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  | $*$ | $*$ |  |

## Table of Specification (TOS)

Table 1: Number of Student Learning outcomes (SLOs) and their cognitive distribution

| Topic No. Topic | Student Learning Outcomes | Total |  |  |  |
| :---: | :--- | :---: | :---: | :---: | :---: |
|  |  |  | $\mathbf{U}$ | $\mathbf{A}$ |  |
| 1 |  | 5 | 4 | 0 | 9 |
| 2 | Presentation of Data | 1 | 6 | 5 | 12 |
| 3 | Graphs and Diagrams | 0 | 1 | 8 | 9 |
| 4 | Averages | 4 | 2 | 12 | 18 |
| 5 | Index Numbers | 4 | 5 | 9 | 18 |
| 6 | Probability Theory | 2 | 9 | 10 | 21 |
|  | Total | $\mathbf{1 6}$ | $\mathbf{2 7}$ | $\mathbf{4 4}$ | $\mathbf{8 7}$ |
|  | Percentage (\%) | $\mathbf{1 8 \%}$ | $\mathbf{3 1 \%}$ | $\mathbf{5 1 \%}$ | $\mathbf{1 0 0 \%}$ |

## Note:

1. Table 1 identifies the Student Learning outcomes and their cognitive distribution (Knowledge, Understanding, Application).
2. The table shows that the share of knowledge is $18 \%$ with 16 SLOs, Understanding is $31 \%$ with 27 SLOs, and Application is $51 \%$ with 44 SLOs.
3. Please note that Table 1 does not translate to marks distribution in the exam paper and weightage of each topic is calculated separately in Table 3

Table 2: No. of SLOs and their \% Share per Topic

| Topic No | Topic | Total SLOs | \% Share of SLOs |
| :---: | :--- | :---: | :---: |
| 1 | Introduction | 9 | $10 \%$ |
| 2 | Presentation of Data | 12 | $14 \%$ |
| 3 | Graphs and Diagrams | 9 | $10 \%$ |
| 4 | Averages | 18 | $21 \%$ |
| 5 | Index Numbers | 18 | $21 \%$ |
| 6 | Probability Theory | 21 | $24 \%$ |
|  | Total | $\mathbf{8 7}$ | $\mathbf{1 0 0 \%}$ |

## Note:

1. Table 2: shows the $\%$ share of SLOs per Topic.
2. The Topics of Probability Theory has the highest $\%$ share of SLOs at $24 \%$, followed by Index numbers and Averages at $21 \%$ each.
3. Please note that Table 2 does not translate to marks distribution in the exam paper and weightage of each topic is calculated separately in Table 3

Table 3: Exam Paper Specification, Topic Difficulty, Types of Questions, No. of Questions per Topic, and Marks Allocation per Section

| Topics | Difficulty Level | Section A MCQs @ 1 mark each | Section B <br> CRQ/SAQs <br> © <br> 4 marks each | Section C ERQ/DAQs @ 10 marks each |
| :---: | :---: | :---: | :---: | :---: |
| Introduction | Easy | 2 | 1 | 1 |
| Presentation of Data | Easy | 1 | 1 |  |
| Graphs and Diagrams | Easy | 1 | 1 |  |
| Averages | Moderate | 2 | 1 |  |
| Index Numbers | Moderate | 2 | 2 | 1 |
| Probability Theory | Moderate Difficult | 2 | 2 | 1 |
| Total questions to be given |  | 10 | 8 | 3 |
| Total questions to be attempted |  | 10 | 5 | 2 |
| Maximum marks obtainable |  | 10 | 20 | 20 |

## Note:

1. Table 3 displays Paper specification, Topic difficulty level, the 3 types of Questions used, the number of questions per topic to be used, marks allocation per section.
2. The Exam Paper consists of 3 Sections:
a. Section $\mathrm{A}=$ Multiple Choice Questions (MCQs)
b. Section $B=$ Short Answer Questions / Constructive Response Questions (CRQs)
c. Section $\mathrm{C}=$ Detailed Answer Questions / Extended Response Questions (ERQs); require more detailed answers necessitating a broader understanding of concepts, and complex calculations compared to CRQ

# ZIAUDDIN UNIVERSITY EXAMINATION BOARD <br> GRADE XII - BUSINESS STATISTICS <br> SCHEME OF ASSESSMENT 

## Maximum Marks: 50

Section 'A': Multiple Choice Questions (20\%) 10 Marks
$(1 \times 10=10)$
Multiple Choice Question will cover the complete Syllabus

- Each MCQ carries 1 mark
- Given MCQs will be $=10 \mathrm{MCQs}$
- All MCQs to be answered

Section 'B': Short Answer Questions (40\%) 20 Marks
( $4 \times 5=20$ )

- Short Answer Question must be given from the prescribed Syllabus all content is to be followed.
- Seven (7) Short Answer Questions may be given. Each Question having (4 Marks). In this Section Student shall attempt (5 Questions).

Section "C" (Detailed Answer Questions) (40\%) 20 Marks
$(2 \times 10=20)$

- Three (3) Detailed Answer Questions may be given in this section and (2 Questions) are to be answered and each Question having (10 Marks).

| DEFINITIONS OF COGNITIVE LEVELS |  |
| :---: | :---: |
| Remember <br> Remembering is the act of retrieving knowledge and can be used to produce things like definition or lists. The student must be able to recall or recognize information and concepts. The teacher must present information about a subject to the student, ask questions that require the student to recall that information and provide written or verbal assessment that can be answered by remembering the information learnt. <br> Question Stems <br> Can you name all the ...? <br> Describe what happens when ...? <br> How is (are) ...? <br> How would you define ...? <br> How would you identify ...? <br> How would you outline ...? <br> How would you recognize...? <br> List the ... in order. <br> What do you remember about ...? <br> What does it mean? <br> What happened after? <br> What is (are) ...? <br> What is the best one? <br> What would you choose ...? <br> When did ...? <br> Where is (are) ...? <br> Which one ...? <br> Who spoke to ...? <br> Who was ...? <br> Why did ...? | Understand <br> The next level in the taxonomic structure is Understanding, which is defined as the construction of meaning and relationships. Her the student must understand the main idea of material heard, viewed, or read and interpret or summarize the ideas in their own words. The teacher must ask questions that the student can answer in their own words by identifying the main idea. <br> Question Stems <br> Can you clarify...? <br> Can you illustrate ...? <br> Condense this paragraph. <br> Contrast ... <br> Does everyone think in the way that ... does? <br> Elaborate on ... <br> Explain why ... <br> Give an example <br> How can you describe <br> How would you clarify the meaning <br> How would you compare ...? <br> How would you differentiate between ...? <br> How would you describe...? <br> How would you generalize...? <br> How would you identify ...? <br> Is it valid that ...? <br> Is this the same as ...? <br> Outline ... <br> Select the best definition <br> State in your own words <br> This represents ... <br> What are they saying? <br> What can you infer from ...? <br> What can you say about ...? <br> What could have happened next? <br> What did you observe? <br> What does this mean? <br> What expectations are there? <br> What information can you infer from <br> What is the main idea of ...? <br> What restrictions would you ad <br> What seems likely? |

|  | What seems to be ...? <br> What would happen if ...? <br> What would happen if ...? <br> Which are the facts? <br> Which statements support ...? |
| :---: | :---: |
| Apply <br> The third level in Bloom's taxonomy, Applying marks a fundamental shift from the pre-Bloom earning era because it involves remembering what has been learnt, having a good understanding of the knowledge, and applying it to real-world exercises, challenges or situation. Students must apply an abstract idea in a concrete case to solve a problem or relate it to prior experience. The teacher must provide opportunities for students to use theories and problem-solving techniques in new situations and review and check their work. Assessment questions should be provided that allow students to define and solve problems. <br> Question Stems <br> Can you group by characteristics such as...? <br> Choose the best statements that apply <br> Clarify why ... <br> Do you know of another instance where...? <br> Draw a story map <br> Explain why a character acted in the way that he did <br> From the information given, can you develop a set of instructions about ...? <br> How could you develop ...? <br> How would you change ...? <br> How would you demonstrate...? <br> How would you develop ... to present <br> How would you explain ...? | Analyze <br> Analyzing is the cognitive level where students can take the knowledge they have remembered, understood and applied, then delve into that knowledge to make associations, discernments or comparisons. Students should break down a concept or idea into parts and show relationship between these parts. Teachers must give student time to examine concepts and their requisite elements. <br> Students are required to explain why they chose a solution. <br> Question Stems <br> - Can you distinguish between ...? <br> - Can you explain what must have happened when ...? <br> - Determine the point of view, bias, values, or intent underlying the presented material <br> - Discuss the pros and cons of ... <br> - How can you classify ... according to ...? <br> - How can you compare the different parts? <br> - How can you sort the different parts...? <br> - How is ... connected to ...? <br> - How is ... similar to ...? <br> - How would you categorize...? <br> - How would you explain? <br> - If ... happened, what might the ending have been? <br> - State the point of view of ... <br> - What are some of the problems of ...? <br> - What assumptions ...? <br> - What can you infer about...? <br> - What can you point out about? <br> - What conclusions ...? <br> - What do you see as other possible outcomes? <br> - What does the author assume? <br> - What explanation do you have for ...? <br> - What ideas justify the conclusion? <br> - What ideas validate...? <br> - What is the analysis of ...? <br> - What is the function of ...? |

| - What is the problem with $\ldots$ ? |
| :--- | :--- |
| - What motive is there? |
| - What persuasive technique is used? |
| - What statement is relevant? |
| - What was the turning point? |
| - What were some of the motives behind...? |
| - What's fact? Opinion? |
| - What's the main idea? |
| - What's the relationship between? |
| - Which events could not have happened? |
| - Why did ... changes occur? |
| - Why do you think? |

## BLOOMS TAXANOMY WITH EXAMPLES

If you are a teacher looking for ways to engage your students in learning, this LIST of questions might be interesting for your classroom practice. Bloom's Taxonomy question stems can help elicit higher-order thinking skills and promote critical thinking among learners at different taxonomy levels. These question stems can also encourage students to think about their knowledge through reflection before answering questions.

ACTION WORDS FOR COGNITIVE LEVELS

## Total Marks: 50

Class XII
Time Allowed: 15 minutes
Q1:
Note: Attempt all question from this section. Each question carries one mark

1. The data collected form a magazine is called $\qquad$ data
a. Primary
b. Tertiary
c. Secondary
d. none of these
2. $A$ $\qquad$ describes a characteristic of a population.
a. Sample
b. variable
c. parameter
d. none of these
3. If width of each class interval is 10 and the No. of classes is 6 , then Range would be:
a. 16
b. 60
c. 66
d. 600
4. The sum of all relative frequencies should be equal to:
a. 1
b. 100
c. 10
d. 0.1
5. To draw a pie diagram for the following table, the angle of the sector of Category $D$ will be

| Category | A | B | C | D | E |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Frequency | 5 | 8 | 3 | 10 | 4 |

a. $120^{\circ}$
b. $180^{\circ}$
c. $360^{\circ}$
d. $100^{\circ}$
6. If a mean of data of 50 observations is 400 , then $\sum x$ is equal to
a. 1000
b. 10,000
c. 30,000
d. 20,000
7. The price relatives obtained by chain base method are called
a. Value relatives
b. quantity relatives
c. supply relatives
d. link relatives
8. If Laspeyre's Price Index i.e., $\mathrm{P}_{01}=140.65$, and $\sum P o Q o=95$, then $\sum P 1 Q o=$ $\qquad$
a. 133.61
b. 100
c. 270.16
d. 166.66
9. In how many ways can 5 women be seated at a salon in a row having 4 seats?
a. 60
b. 120
c. 20
c. 100
10. A coin is tossed two times what is the probability of getting two tails?
a. $\frac{1}{2}$
b. $\frac{1}{10}$
C. $\frac{2}{4}$
d. $\frac{1}{4}$

Class XII
Time 1 hour 45 minutes

HIGHER SECONDARY SCHOOL CERTIFICATE EXAMINATION 2024 SUBJECT: BUSINESS STATISTICS SECTION "B" AND SECTION "C" SECTION "B" SHORT ANSWER QUESTIONS

Total Marks 40
Marks 20

## Q2. Answer any five questions. All Questions carry equal marks:

i. Explain the methods of collection of Primary Data.
ii. Following is a set of test scores in Business Statistics. Construct a frequency distribution for this data.

| 40 | 28 | 26 | 48 | 39 |
| :---: | :---: | :---: | :---: | :---: |
| 42 | 37 | 40 | 41 | 34 |
| 25 | 41 | 43 | 31 | 27 |
| 30 | 39 | 27 | 32 | 33 |
| 32 | 35 | 26 | 46 | 47 |

iii. Draw a Frequency Curve for the following frequency distribution

| C.I | $3-5$ | $6-8$ | $9-11$ | $12-14$ | $15-17$ | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| f | 1 | 8 | 12 | 6 | 3 | 30 |

iv. The daily wages of 25 Electricians are as follows:

| Daily wages in Rs. (x) | 500 | 550 | 600 | 700 | 800 | 1000 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of Electricians (f) | 5 | 8 | 2 | 4 | 2 | 4 |

a. Find average earnings from the following data.
b. Also find the mean of $y$ if $y=4 x-150$
v. From the table give below, use the data to calculate the index number of prices of all the years with reference to 2020 as the base year, using Fixed Base Method

| Items | $\mathbf{2 0 2 0}$ | $\mathbf{2 0 2 1}$ | $\mathbf{2 0 2 2}$ | $\mathbf{2 0 2 3}$ |
| :---: | :---: | :---: | :---: | :---: |
| Rice | 51 | 52 | 53 | 55 |
| Wheat | 62 | 65 | 68 | 70 |
| Maize | 36 | 40 | 45 | 60 |
| Sugar | 42 | 55 | 58 | 60 |

vi. A pair of dice is rolled once. What is the probability of getting:
a. A total of 10
b. A total of 4
vii. From the data given below, calculate the index number of prices for all three years with reference to 2018 as the base year, using simple aggregative method.

| Year | Price |  |  |
| :---: | :---: | :---: | :---: |
|  | Tea | Coffee | Cold Drink |
|  | 50 | 90 | 65 |
| 2019 | 55 | 95 | 70 |
| 2020 | 56 | 100 | 72 |
| 2021 | 58 | 100 | 75 |

viii. Eight players of Pakistan's Football team can play in any of the six forward line positions. In how may ways can these be filled.

## SECTION "C" DETAILED ANSWER QUESTIONS

Marks 20

## Note: Attempt any two questions from the following. All questions carry equal marks

Q3. Find the probability:
(i) Two cards are drawn in succession from a deck of 52 playing cards without replacement. What is the probability that both cards are Hearts?
(ii) A dice is thrown two times. Find the probability of getting 6 on the first throw and an even number on the second throw.

Q4. The prices and quantities of four commodities for the year 2021 and 2022 are as under:

| Commodity | Price |  | Quantity |  |
| :---: | :---: | :---: | :---: | :---: |
|  | $\mathbf{2 0 2 1}$ | $\mathbf{2 0 2 2}$ | $\mathbf{2 0 2 1}$ | $\mathbf{2 0 2 2}$ |
| Washing Powder | 130 | 160 | 70 | 80 |
| Soap | 60 | 70 | 80 | 90 |
| Washing liquid | 170 | 200 | 90 | 100 |
| Shampoo | 150 | 220 | 100 | 110 |

Compute the Index numbers of the year 2022 by using the following:
i. Laspeyre's Index Number
ii. Paasche's Index Number
iii. Fisher's Index Number.

Q5. Consider the following data

| 22 | 24 | 27 | 16 | 23 | 28 | 21 | 16 | 27 | 22 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 18 | 17 | 26 | 16 | 24 | 18 | 18 | 24 | 16 | 21 |
| 28 | 21 | 16 | 27 | 22 | 15 | 22 | 24 | 17 | 15 |
| 26 | 16 | 24 | 18 | 21 | 27 | 16 | 26 | 17 | 26 |

a. Develop a frequency distribution using classes of 15-17, 18-20, 21-23, 24-26, 27-29
b. Develop a Relative Frequency Distribution
c. Develop a Percentage Frequency Distribution
d. Find Class Boundaries and Mid value
e. Develop Cumulative Frequency Distribution for 'Less than' and 'More than'
